Craig Dukes and Lanchun Lu

University of Virginia

MIPP collaboration meeting (Aug. 09, 2003)

- PMTs and bases installed

- Light-tight box fabricated and partically installed

- Muon counters fabricated

- Muon counters support stand designed and being fabricated

- Expect to complete work $\sim$ Aug. 23

- Cables being made by Fermilab technicians

- Have decided to use 14-bit ADC made for HyperCP (and read out through Nevis system)

- Special CAMAC interface board being fabricated at UVA. Will be ready by the end of August.

- Fast clear being implemented in case second-level trigger is needed.
